| <b>TEST STANDARD</b><br>(SUCH AS ASTM/BS EN/ DN ETC)                                          | EN 12101-3 (2015): Smoke and heat control systems. Part 3: Specification for powered smoke and heat control ventilators (Fans)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | EFR-19-001286 |
| <b>TEST DESCRIPTION</b>                                                                       | <p>a) Warm up period</p> <p>In the first phase of test, the fan works at ambient temperature for at least 60 minutes in order to obtain on the motor frame a temperature rise in 10 minutes lower than 2°C. During this period, the working point of the fan is adjusted so that the fan absorbs at least at 80 % of the rated power of the motor.</p> <p>The measures are stabilised, in particular volume flow and pressures, before beginning the heat up period.</p> <p>b) Heat up period</p> <p>The burners of furnace are monitored to reach the hot temperature, (e.g. 300°C), in a time specified in the standard: between 5 minutes and 10 minutes.</p> <p>c) High temperature period</p> <p>The duration of the high temperature period is 120 min.</p> <p>After 15 minutes of functioning at high temperature, the fan is stopped for 2 minutes and restarted.</p> <p>Criteria of performance: the volume flow determined during the test at high temperature shall not change by more than 10 % of the volume flow determined at the end of the warm up period.</p> | EFR-19-001286 |
| <b>SPECIFICATION OF TEST SPECIMEN</b>                                                         | <p>Tests were performed on 7 selected sizes from the range of ventilators: 400 - 500 - 550 - 800 - 1250 - 1400 - 1600.</p> <p>The tests results allow covering the following sizes of ventilators: 400, 450, 500, 560, 630, 700, 800, 900, 1000, 1120, 1200, 1250, 1400, 1500, 1600.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | EFR-19-001286 |
