

Efectis is an independent third party assessing the fire performance of products, systems or constructions. We can help you worldwide.

## FAÇADE FIRE TESTING - WHERE PERFORMANCE MEETS PROOF

### BUILD WITH CONFIDENCE - TEST WITH PRECISION

Our full-scale BS 8414 façade fire testing service helps you prove the fire safety performance of your external wall systems from concept to certification.

### WHY CHOOSE US

- ✓ **Accredited Facility** – Fully equipped test rigs compliant with BS 8414-1 & BS 8414-2
- ✓ **Expert Team** – Decades of combined experience in façade fire behaviour and system evaluation
- ✓ **Comprehensive Service** – Design review, test preparation, data analysis, and final reporting
- ✓ **Fast Turnaround** – Efficient scheduling and reporting to meet your project timelines
- ✓ **Client** – Centric Support – Guidance through each step, ensuring clarity and confidence

### OUR CAPABILITIES

- BS 8414-1: Testing cladding systems fixed to a masonry substrate
- BS 8414-2: Testing cladding systems fixed to a steel frame
- Thermocouples and video monitoring throughout for precise temperature and flame spread analysis
- System classification per BR 135 classification

### TRUSTED BY LEADING INDUSTRY NAMES

We've supported architects, developers, and cladding manufacturers across high-profile projects globally ensuring their façades meet the strictest safety standards.

### LET'S MAKE YOUR SYSTEM STAND THE TEST
